

CONVENTIONAL - 58°C Fixed Temperature Thermal Detector Model ECO1005T

Overview

Features

- Low profile design
- Low current draw
- 58°C operating temperature
- Operates at 12 and 24VDC
- Remote alarm test feature
- Easy Maintenance
- Range of detector bases available
- Remote LED Option
- Approved to EN54 –5:2000 Class A2S
- Extended warranty

199n/06

G201073

0832-CPD-0067

Description

The ECO1005T thermal detector belongs to System Sensor's ECO1000 range of detectors. ECO1000 is a range of conventional detectors, which have been produced using the latest in manufacturing technology and supplied with an array of advanced features, making them 'better by design'.

The ECO1005T thermal detector uses a state of the art thermal element combined with an application specific integrated circuit (ASIC) to provide quick and accurate detection of fires. The detector incorporates a static element and is suitable where ambient conditions normally exhibit rapid changes in temperature e.g. kitchens.

A laser-based hand held Remote Test Unit can be used in conjunction with the range of ECO1000 detectors for alarm test purposes. The unit transmits a coded message, preventing spurious alarms being generated by other laser-based devices. With a range of several metres, the hand held test unit provides an effortless way of remotely alarm testing the range of ECO1000 detectors and removes the need for any direct physical access to the detector by the user.

The ECO1005T detector also has an integral LED, which illuminates to provide a local alarm signal. This latches on, and remains illuminated until the detector is reset by a momentary power interruption. An optional remote LED annunciator may be used to repeat any alarm signal.

A variety of detector bases can be used with the ECO1005T detector, providing application flexibility and compatibility with a wide range of Fire Alarm Control Panels. All bases are fitted with a shorting spring to permit circuit testing prior to fitting the detector and have a tamper resistant feature, which when activated prevents removal of the detector without the use of a tool.

All System Sensor products are covered by our extended 3-year warranty.

Architect/Engineer Specifications

ECO1005T 58°C Fixed Temperature Thermal Detector

Electrical Specifications

Operating Voltage Range	8 to 30VDC (Nominal 12/24VDC)
Maximum Standby Current @25°C	70µA @ 24VDC
Maximum Permissible Alarm Current	80mA (current limited by control panel)

Environmental Specifications

Application Temperature Range (see note 1)	-30°C to 70°C
Humidity	5% to 95% Relative Humidity (non-condensing)

Mechanical Information

Height	40.5mm (plus 9.5mm for standard base, 21mm for deep base)
Diameter	102mm
Weight	70g (plus 45g for standard base)
Wire Gauge for Terminals	0.4mm ² to 2.0mm ²
Colour	Approximates to RAL9016
Material	ABS

Product Range

Bases (see note 2)	
ECO1000B Standard Base	ECO1000BSD Standard base with Schottky diode
ECO1000R Resistor base 470 Ohm	ECO1000BRSD Resistor base 470 Ohm with Schottky diode
ECO1000DB Deep base	ECO1000DBSD Deep base with Schottky diode
ECO1000DBR Deep resistor base 470 Ohm	ECO1000DBRSD Deep resistor base 470 Ohm with Schottky diode
ECO1000BREL12L Relay base 12V Latching	ECO1000BREL12NL Relay base 12V Non –latching
ECO1000BREL24NL Relay base 24V Latching	
Accessories	
ECO1000RTU Remote Test Unit	
Other Detectors	
ECO1002 Photoelectric/Thermal Detector	ECO1003 Photoelectric Detector
ECO1004T 78°C Fixed Temperature Thermal Detector	ECO1005 Rate of Rise & 58°C Fixed Temperature Thermal Detector

Notes

Bases with other resistor values are available to suit the requirements of most Fire Alarm Control Panels.
